

JEAKSAR RASHO

Test Lead

I am a confident, structured and solution-oriented consultant with a strong focus on quality and collaboration. I work methodically, remain calm in complex and changing environments and easily build trust with both clients and teams. I prefer clear communication and well-founded decisions, and thrive in assignments where long-term thinking, responsibility and continuous improvement are central. I am motivated by contributing stability, clarity and professional leadership in complex IT deliveries.

* EXPERIENCE

2022 – 2025 Läkemedelsverket, Senior Test Automation & DevOps Engineer

- Responsible for modernizing and stabilizing the agency's test automation strategy to enable continuous delivery (CI/CD) with high reliability.
- Designed and implemented new E2E tests in Cypress for mission-critical modules. Conducted a comprehensive refactoring of the existing test framework to improve execution times and reduce "flaky tests". Established a long-term strategy and guidelines for the team's automation work.
- Created a more reliable regression package through a new tag structure. This led to 80% automation of critical flows and a significantly higher level of confidence in automated tests within the organization.

Methods and Tools used:

Cypress, JavaScript, TypeScript, Azure DevOps Pipelines, Git, CI/CD, Page Object Model (POM), Refaktorering.

Recommendations:

Jeaksar demonstrated high technical skill and proactivity by not only building new, but also improving the existing, which led to a more stable and easier-to-use test environment for the entire team.

2023 – 2024 Läkemedelsverket, Test Lead & Release Management

- Led quality assurance during a critical version upgrade of the agency's central document management system (OpenText Documentum/D2), a system with strict legal requirements.
- Planned and coordinated all system testing and acceptance testing (UAT). Acted as the link between IT developers and business experts to validate that complex business rules and legal requirements were complied with in the new version.
- A flawless production launch of an agency-wide system. No critical incidents were reported after release, which ensured the agency's ongoing case management.

Methods and Tools used:

Azure Test Plans, Documentum (D2), UAT-ledning, Riskbaserad testning, Stakeholder Management.

2020 – 2022 Läkemedelsverket, Test Leader - Team Leader

- Strategic assignment to consolidate the agency's test assets and introduce a standardized agile working method in the Azure DevOps platform.
- Led the migration of over 400 test cases from TestRail to Azure Test Manager. Developed and anchored new processes for requirements traceability and test execution for three development teams. Trained users and colleagues in agile methodology and tool usage.

- A unified and searchable test database that significantly improved traceability between requirements and tests. The process optimization contributed to halving the system test period through better structure and automation.

Methods and Tools used:

Azure DevOps (Boards, Test Plans), TestRail, Agile transformation, Scrum, Kanban, Workshop facilitation, Test data management.

Recommendations:

Jeaksar played a key role in our digital transformation by successfully implementing modern tools and coaching the teams in new efficient ways of working.

2017 – 2020 Btwentyfour, Test Manager & System Integrator

- Assignment to build the testing function from scratch in a fast-growing company focused on business integrations (EDI).

- Established the first formal testing process in an agile team. Developed automated integration tests to validate complex data flows between different business systems.

- Significantly increased product quality and delivered all releases in 2019 with zero production disruptions.

Methods and Tools used:

Robot Framework, SQL Server, EDI-standarder, C#, .NET, Integrationstestning.

Recommendations:

As a lone tester, Jeaksar demonstrated an impressive ability to take overall responsibility and quickly build a functioning testing organization that delivered measurable results.
